The Honorable Mike Ross
U.S. House of Representatives
2436 Rayburn House Office Building
Washington DC, 20515

Dear Representative Ross,

On behalf of the members of the Texas Academy of Audiology, thank you for championing the Medicare Hearing Health Care Enhancement Act of 2009 (HR 3024). As you've recognized, this legislation is extremely important for supporting the needs of Medicare beneficiaries with hearing disorders.

The Texas Academy of Academy fully endorses HR 3024, which would give Medicare beneficiaries direct access to an audiologist for evaluation of their hearing and balance/vestibular problems, without requiring that the beneficiary be under the care of (or referred by) a physician or other health care practitioner. This legislation would improve, and expedite, the beneficiaries' access to hearing health care without diminishing the role of physicians or expanding the scope of practice of audiologists.

Since 1992, the Department of Veterans Affairs has allowed veterans to see an audiologist without requiring a referral from a physician. The VA's review of this practice has shown that direct access to audiology services has provided **quality** and **cost-effective hearing health care** to patients. Other health care programs, including the Federal Employee Health Benefits Program (administered by the Office of Personnel Management) and many private health plans, also allow their beneficiaries to have direct access to audiologists, as well.

The Texas Academy of Audiology appreciates your efforts in promoting this important initiative in the 111th Congress. Thank you for recognizing the need for improving the use of available hearing health care resources in America and for spearheading momentum to improve access to care for hearing-impaired Americans.

Respectfully,

Matthew Lyon, M.A. FAAA
President, Texas Academy of Audiology
